

如同在野外大自然環境般獲取的天然營養 強健鳥兒專用保健品

Nutrients like in the Wild. targeted support for strong birds

- ✓ 維生素 (Vitamins)
- ✓ 礦物質 (Minerals)
- ✓ 蛋白質 (Proteins)
- ✓ 提供予業餘飼主玩家及繁殖育種人士 (For hobby keepers & breeders)
- ✓ 已成功在超過 40 個國家使用 (Successfully used in over 40 countries)
- ✓ 益生菌 (Probiotic bacteria)
- ✓ 實用 500 克便攜罐裝 (In practical 500g jars)
- ✓ 必需微量元素 (Essential trace elements)
- ✓ 大小型鸚鵡、小型嬌雀觀賞鳥、軟嘴鳥、吸蜜鸚鵡及鴿子咸適用 (For parrots, parakeets, small birds, softbills, lorikeets and pigeons)

特予眾鳥兒們的營養補充食品 (Supplementary feed for all birds)

我們的補充飼料是專為日常飲食的針對性添加而開發的 — 基於科學知識以及受到了野生鳥類的自然飲食所啟發。無論是興趣業餘飼養、飼養敏感性物種 (對環境條件變化反應敏感的物種)，還是進行高要求的嚴格繁殖計劃，我們的產品都能夠於您的愛鳥的特殊生命階段 (包括生病期間) 或營養需求增加的時期提供所需的維生素、礦物質和生物活性物質，從而精準地帶來額外福利。

Our supplementary feeds were developed as a targeted addition to daily feeding — based on scientific knowledge and inspired by the natural diet of wild birds. Whether for hobby keeping, sensitive species, or demanding breeding programs, our products provide exactly the added benefit of vitamins, minerals, and bioactive substances that your birds need during special life stages (including illness) or periods of increased demand.

這些配方乃根據我們已通過考驗的顆粒滋養丸以及天然手養配方系列產品之經驗，它們超越了基礎營養、亦特地補充了日常餵食中經常缺乏的營養成分 — 例如強健骨骼所需的鈣、幫助吸收的維生素 D3、支持腸道菌叢的益生菌，或是螺旋藻等天然免疫增強劑。

The formulations are based on our experience with our proven Vital Pellets and our natural hand-rearing line. They go beyond basic nutrition and specifically supply what is often missing in daily feeding — whether calcium for bone strength, vitamin D3 for absorption, probiotics to support gut flora, or natural immune boosters such as spirulina.

透過整合高品質的天然成分 — 例如植物萃取物、維生素和礦物質 — 我們的營養補充品可溫和地支持消化、新陳代謝、肝功能、生育能力以及免疫系統；與傳統的营养補充劑不同，我們的產品不依賴人工載體或可疑的填料，而是專注於純度、有效性以及鳥兒的相容性上。

By integrating high-quality natural ingredients — such as plant extracts, vitamins, and minerals — our supplements gently support digestion, metabolism, liver function, fertility, and the immune system. Unlike conventional supplements, our products do not rely on artificial carriers or questionable fillers, but instead focus on purity, effectiveness, and bird compatibility.

無論是換羽期的針對性支持、繁殖育種準備、疾病後的重建，或是作為日常的健康照料 — 本系列產品『您的鸚鵡營養補充保健食品』都是負責任的飼主與培育者之理想選擇～他們只想給自己的鳥兒最好的！

Whether as targeted support during molting, preparation for breeding, regeneration after illness, or for daily health care — Your Parrot supplementary feeds are the ideal addition for responsible keepers and breeders who want only the best for their birds.

營養補充品！由專家配製，深受獸醫、育種者和寵物鳥愛好者的信賴。
SUPPLEMENTS. Formulated by Experts. Trusted by Vets, Breeders & Pet Bird Lovers.

為什麼維生素對您的愛鳥健康至關重要？ (Why Vitamins Are Essential for Your Bird's Health)

鳥類和人類一樣，都需要維生素才能健康成長！這些微小的營養物質在能量產生、免疫力、羽毛質量，甚至繁殖成功率方面都扮演著巨大的角色、發揮巨大的作用。然而，以種子為主食的鳥類常常面臨營養缺乏的問題，因為種子缺乏必需的維生素和礦物質。即使是優質的混合種子也無法提供鳥類保持最佳健康狀態所需的全方位營養。

Birds rely on vitamins to thrive—just like humans! These tiny nutrients play a huge role in energy production, immunity, feather quality, and even breeding success. However, birds on seed-based diets often face deficiencies, as seeds lack essential vitamins and minerals. Even high-quality seed mixes can't provide the full spectrum of nutrients birds need for optimal health.

水溶性維生素（必須每日補充） Water-Soluble Vitamins (must be replenished daily)：

維生素 B 群： 對新陳代謝、神經功能和羽毛生長至關重要 (B-Complex: Vital for metabolism, nerve function, feather growth)

維生素 C： 增強免疫力，促進傷口癒合 (Vitamin C: Boosts immunity and aids in healing)

脂溶性維生素（儲存在體內） Fat-Soluble Vitamins (stored in the body)：

維生素 A： 對視力、皮膚和呼吸系統健康至關重要 (Vitamin A: Crucial for vision, skin, and respiratory health)

維生素 D3： 確保骨骼強健與鈣質吸收 (Vitamin D3: Ensures strong bones and calcium absorption)

維生素 E： 保護細胞並支持肌肉功能 (Vitamin E: Protects cells and supports muscle function)

維生素 K： 血液凝固和傷口癒合的關鍵 (Vitamin K: Key for blood clotting and wound healing)

籽食の困境 (The Seed Dilemma)

種子的脂肪含量高，維生素含量低，長期只餵種子會導致營養缺乏，進而引發羽毛品質不佳、免疫力下降，甚至器官損傷等等問題。

Seeds are high in fat and low in vitamins. Over time, a seed-only diet leads to deficiencies, causing issues like poor feather quality, weakened immunity, and even organ damage.

我們的解決辦法 (Our Solution)：

我們的營養補充品可以彌補這些營養缺口，它們採用均衡且生物利用度高的維生素和礦物質配方，能夠將您愛鳥的飲食從“僅求生存”轉變為蓬勃成長茁壯，搭配新鮮蔬菜、優質顆粒飼料以及我們的強化型益生菌複方或複合維生素 B 群等等產品，堪可擬定一套完整的營養計劃。

YOUR PARROT Supplements fill these gaps! Formulated with balanced, bioavailable vitamins and minerals, they transform your bird's diet from “surviving” to thriving. Pair them with fresh veggies, vital pellets, and our products like YOUR PARROT Probiotic + or B-Complex for a complete nutritional plan.

適用於鳥兒各個生涯階段的最佳理想組合 (The right combination for every life stage)

如何搭配 (一起) 使用？ (How to use in combination?)

Life phase	Product	Dosage	Support
Breeding preparation / Breeding season	Breeder Booster, Vitamin E, Calci Power	10-20 g per kg feed Read dosage	Supports fertility, egg quality, and eggshell health. Vitamin E has a stimulating effect.
Moulting / Growth / Transition	B-Komplex, Protein Pro 50, Probiotic +, Calci Power	10-15 g per feed. Read dosage	For plumage development, energy and digestion
Stress / Digestive problems	Probiotic +, B-Komplex, Protein Pro 50	10g / 250 ml water or 100g food. Read dosage	For metabolism & immune system
Growing young birds & Breeding females	Calci Plus, Probiotic +	10g / 250 ml water or 100g food. Read dosage	For strong bones, young bird development, breeding female preparation

餵食與營養補充計畫 (Feeding & Supplement Plans)

你有餵食至少 70%的我們的活力滋養丸嗎？ (Do you feed at least 70% Vital Pellets?)

Plan 1

當我們的高品質活力顆粒滋養丸一貫地佔據每日口糧配給量的至少 70-80%時，通常已足以完全滿足您的愛鳥的營養需求，在此情形下，只有在針

對特定需求與狀況下，才需要額外補充我們的優質營養補充劑，例如在繁殖準備、換羽、幼鳥生長階段，或是在生病或接受醫療後的康復期間等特殊生命階段。

Our high-quality Vital Pellets usually fully cover your birds' nutritional requirements when they consistently make up at least 70–80% of the daily ration. In this case, additional supplementation with our premium supplements is only required in a targeted and situational manner — for example during special life phases such as breeding preparation, molting, the growth phase of young birds, or during recovery after illness or medical treatment.

歸功於維生素、礦物質、天然植物成份和益生菌的科學均衡營養組合之配比，我們的活力滋養丸塑造出堪能反映自然、儘可能貼近於野生狀態之天然飲食方式 — 無人工添加物、缺乏營養價值的填充充飢物，或防腐劑。

Thanks to their scientifically balanced composition of vitamins, minerals, natural plant ingredients, and probiotics, Vital Pellets are formulated to reflect a natural, close-to-wild diet — without artificial additives, nutritionally empty fillers, or preservatives.

你餵的是以種子為主食之飼料嗎？ (Do you feed a seed based diet?)

如果鳥兒仍然被主要以綜合穀物種子類的飼料來飼養的話，在多數情況下牠們對額外必需營養素的需求會顯著增加，由於單靠種子食物是無法提供充份的養份諸如鈣、維生素 D3、維生素 B 群、必需氨基酸，或益生菌等等營養素的，在此情況下，按照計畫進行具有針對性之補充性餵食便是有其必要的了！

If birds are still fed predominantly with seed mixes, there is in most cases a significantly increased need for additional vital nutrients, as seeds alone do not sufficiently provide nutrients such as calcium, vitamin D3, B vitamins, essential amino acids, or probiotics. In this case, targeted supplementary feeding according to the plan is essential.

維他命 B 群 (B-COMPLEX)／複合維生素 B

- ✔ 促進羽毛生長發育和皮膚健康 (Promotes feather formation and skin health)
- ✔ 增強免疫系統 (Supports the immune system)
- ✔ 支持神經系統 (Supports the nervous system)
- ✔ 促進新陳代謝 (Boosts metabolism)

我們的複合維生素 B 補充劑是一種針對鳥類維生素 B 群缺乏症的針對性補充，旨在支持神經系統健康並優化蛋白質、脂肪和碳水化合物之代謝。

YOUR PARROT B-Complex is a targeted vitamin supplement designed to address B-vitamin deficiencies in birds, supporting nervous system health and optimizing metabolism for proteins, fats, and carbohydrates.

主要優勢／關鍵效益 (Key Benefits)：

矯正缺陷： 對抗神經質行為 (例如歪頭)、過動症、動作不協調、皮膚問題以及生長遲緩等症狀。

Corrects Deficiencies: Combats symptoms like nervous behaviors (e.g., head tilting), hyperactivity, uncoordinated movements, skin issues, and stunted growth.

壓力及療癒恢復支持： 非常適合正處於經歷壓力、患病或醫療 (例如抗生素) 導致維生素 B 水平下降的鳥類。

Stress & Recovery Support: Ideal for birds undergoing stress, illness, or medical treatments (e.g., antibiotics) that deplete Bvitamin levels.

代謝促進： 增強營養吸收、能量產生以及整體活力。

Metabolic Boost: Enhances nutrient processing, energy production, and overall vitality.

為什麼維生素 B 群如此重要？ (Why B Vitamins Matter)

維生素 B 群對消化、神經功能、心臟健康、血球生成和皮膚完整性至關重要，鳥類在日常飲食中往往缺乏足夠的維生素 B 群，尤其是在換羽、繁殖或恢復期等等高需求時期。

B vitamins are vital for digestion, nerve function, heart health, blood cell formation, and skin integrity. Birds often lack sufficient B vitamins in standard diets, especially during high-demand periods like molting, breeding, or recovery.

只有在產生不足 (例如壓力、疾病或使用藥物) 而出現缺乏時，才使用我們的複合維生素 B 補充劑。

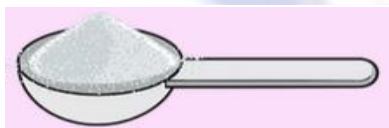

Use YOUR PARROT B-Complex only when deficiencies arise (e.g., stress, illness, or medication use).

沒有特殊需求的健康鳥兒則應繼續使用我們的鈣粉以及強化型益生菌複方。

Healthy birds without specific needs should stick to YOUR PARROT Calci Power & YOUR PARROT Probiotic +

透過恢復維生素 B 群的平衡，此款補充劑可以幫助鳥類保持冷靜、培養韌性強化適應力、持續成長茁壯——無論生活面臨什麼樣的挑戰。

By restoring B-vitamin balance, this supplement helps birds stay calm, resilient, and thriving—no matter life's challenges.

劑量： 每公斤飼料 10 公克 / 14 克量匙 (Dosierung(德): 10g per kg of feed, Measuring scoop = 14g)

您的愛鳥需要充滿活力、羽毛健康以及強健的免疫系統 — 這正是我們研發這款維生素 B 群補充劑的原因。它提供了必需的維生素 B 群以協助新陳代謝，促進羽毛發育，並有助於維護神經系統於壓力時期的平衡，非常適合於繁殖期、換羽期或單純作為日常的補充劑。

Your bird needs energy, healthy plumage, and a strong immune system — this is exactly why we developed our B-Complex supplement. It provides essential B vitamins that support metabolism, aid feather development, and help keep the nervous system balanced during stressful periods. Ideal for breeding, molting, or simply as a daily supplement.

保存期限：生產後 36 個月 (Shelf Life: 36 months after production)

禽鳥專用鈣質補充劑 (CALCI POWER)

- ✓ 依據需求對鈣的補充 (強健骨骼) (For needs-based calcium supply (strong bones))
- ✓ 於繁殖期強化蛋殼 (For strong eggshells during the breeding period)
- ✓ 幫助幼鳥發育 (To support the development of young birds)
- ✓ 由天然礦物質製成 (Made from natural minerals)

我們的禽鳥專用鈣質補充劑是一款專為鳥類健康而特別配製的營養補充劑，尤其適用於繁殖期等關鍵時期，它結合了鈣、鎂和高品質的維生素 B 群，能夠滿足鳥兒的關鍵營養需求。

YOUR PARROT Calci Power is a specially formulated supplement designed to support avian health, particularly during critical phases like breeding. It combines calcium and magnesium with high-grade B vitamins to address key nutritional needs.

主要優勢／關鍵效益 (Key Benefits) :

最佳吸收率： 本配方中的鈣和鎂易於被吸收，是預防鈣鎂缺乏症以及促進蛋殼強健之理想選擇。

Optimal Absorption: The calcium and magnesium in this formula are easily absorbed, making them ideal for preventing deficiencies and promoting strong eggshell development.

平衡育種： 利用將鈣與鎂搭配補充之極佳保健方式，此補充劑有助於維持適當的礦物質平衡，並降低繁殖母鳥出現肌肉痙攣或骨骼虛弱等風險。

Balanced Breeding: By pairing calcium with magnesium, the supplement helps maintain proper mineral balance, reducing risks like muscle cramps or bone weakness in breeding females.

神經系統支持： 添加的維生素 B 群有助於維持鳥類的平靜和健康，支持神經功能，確保更順暢的繁殖週期。

Nervous System Support: Added B vitamins contribute to calm, healthy birds by supporting nerve function, ensuring smoother breeding cycles.

為什麼鈣如此重要？ (Why Calcium Matters)

鈣對骨骼強度、肌肉功能以及形成堅固的蛋殼至關重要。在繁殖期間，母鳥需要額外補充鈣質，以免骨質流失而耗盡自身骨本，引發長期的健康問題。蛋殼脆弱或過薄也會損及雛鳥之生長發育，由於牠們於早期生長階段依賴蛋殼中的鈣質。

Calcium is essential for bone strength, muscle function, and creating sturdy eggshells. During breeding, females require extra calcium to avoid depleting their own bone reserves, which can lead to long-term health issues. Weak or thin eggshells may also harm developing chicks, as they rely on the shell's calcium in early growth stages.

我們的禽鳥專用鈣質補充劑能夠可靠地滿足這些日益增長的需求，保障親鳥以及其幼鳥之健康，是鳥類飼育者和寵物鳥主人的理想選擇。

YOUR PARROT Calci Power provides a reliable solution to meet these increased demands, safeguarding both parent birds and their offspring. Perfect for breeders and pet bird owners.

為什麼礦物質很重要 —— 還有為何光靠種子是不夠的？

Why Minerals Matter – And Why Seeds Aren't Enough?

礦物質對於鳥兒的骨骼、羽毛、神經、繁殖和整體活力至關重要，然而，現今鳥類飼養中的最大隱患之一，就是以種子為主的飲食所造成的礦物質缺乏。

Minerals are essential for your bird's bones, feathers, nerves, reproduction, and overall vitality. Yet one of the biggest hidden problems in bird care today is the mineral deficiency caused by seed-based diets.

雖然種子看似天然，但它們嚴重缺乏了像是鈣、鎂、鋅、鐵、硒和碘等等關鍵礦物質，因此若僅以種子為主要食物之鳥兒很難獲得這些必需營養素，導致骨骼脆弱、繁殖力低下、羽毛問題以及免疫力下降。

While seeds may seem natural, they're severely lacking in key minerals like calcium, magnesium, zinc, iron, selenium, and iodine. Birds eating mostly seeds get very poor access to these vital nutrients – leading to weak bones, poor fertility, feather issues, and low immunity.

在野外，鳥類會本能地透過食用植物、富含礦物質的樹皮、黏土和土壤來平衡它們的飲食。這些天然來源提供了種子中幾乎完全缺乏的各種生物可利用之礦物質。

In the wild, birds instinctively balance their diet by consuming plants, mineral-rich bark, clay, and soil. These natural sources provide a wide spectrum of bioavailable minerals that are almost completely missing from seeds.

因此補充礦物質並非可有可無，而是不可或缺的。尤其對於繁殖期的鳥兒、幼雛以及換羽和壓力階段的鳥兒們而言更是如此。

That's why mineral supplementation is not optional – it's essential. Especially for breeding birds, growing chicks, or during molting and stress phases.

支持自然平衡，為您的愛鳥補充礦物質，讓它們擁有強健的體魄、亮麗光澤的羽毛和健康活力 —— 請選擇採用我們的營養補充食品。

Support nature's balance. Add minerals back into your bird's diet – for strength, shine, and health with YOUR PARROT - Supplements

劑量： 每公斤飼料 10 公克 / 11 克量匙 (Dosage: 10 gramm(德) Per kg Feed, Measuring scoop = 11 GRAMM)

本品鈣質補充劑提供您的愛鳥高品質的鈣質 — 此於骨骼穩定、蛋殼堅固以及幼鳥健康是不可或缺的，尤其在繁殖季節或正逢雛鳥生長階段時，對鈣的需求會增加，本品鈣質補充劑可以輕鬆地混拌入飼料中來為您的愛鳥提供針對性的營養支持。

Calci Power supplies your bird with high-quality calcium — essential for stable bones, strong eggshells, and healthy young birds. Especially during the breeding season or when chicks are growing, the calcium requirement is increased. Calci Power can easily be mixed into the feed to provide your birds with targeted nutritional support.

保存期限：生產後 36 個月 (Shelf Life: 36 months after production)

Product article translated and compiled by :

繁殖育種促進增強劑 (BREEDER BOOSTER)

- ✔ 為繁殖鳥進行針對性之準備的精準營養補充 (For targeted preparation of breeding birds)
- ✔ 提升生育力與卵蛋品質 (Supports fertility & egg quality)
- ✔ 改善活力與身體狀況 (Improves vitality and condition)
- ✔ 富含多種珍貴的維生素和礦物質 (With valuable vitamins & minerals)
- ✔ 經 40 多個國家證實之有效配方 (Proven formula for breeders in over 40 countries)

我們的繁殖營養補充品是一款全面的鳥類營養補充品，旨在彌補營養缺口，促進鳥兒的長期健康，它富含必需維生素、胺基酸、礦物質和微量元素，即使在飲食不足或鳥類處於繁殖期時，也能確保您的愛鳥成長茁壯。

YOUR PARROT Breeder Boost is a complete avian supplement designed to fill nutritional gaps and promote long-term health in birds. Packed with essential vitamins, amino acids, minerals, and trace elements, it ensures your birds thrive even when their diet falls short or if the birds are in the breeding time.

主要優勢／關鍵效益 (Key Benefits)：

全面(完整)營養： 解決隱性維生素缺乏問題，這些問題隨著時間的推移會削弱免疫力並縮短壽命。

Comprehensive Nutrition: Addresses hidden vitamin deficiencies that, over time, can weaken immunity and shorten lifespans.

增強新陳代謝： 促進營養吸收，幫助鳥兒最大限度地從食物中獲取能量和活力。

Enhanced Metabolism: Boosts nutrient absorption, helping birds get the most out of their food for better energy and vitality.

壓力支持： 於換羽、繁殖或環境變化等等挑戰時期安全調整劑量，以常保最佳健康狀態。

Stress Support: Safely adjust dosing during challenging periods like molting, breeding, or environmental changes to maintain optimal health.

為什麼繁殖促進增強劑如此重要？ (Why Breeder Boost Matters)

高達 90% 的鳥類健康問題源自於營養不足，維生素就像身體的“火星塞”，分解蛋白質、碳水化合物和脂肪，而為從羽毛質量到免疫功能等各個方面提供能量。我們的繁殖育種促進增強劑以鳥兒喜愛的形式提供這些關鍵營養素——只需將其添加到牠們的日常飲用水中或軟食飼料中即可。

Up to 90% of bird health issues stem from inadequate nutrition. Vitamins act as the body's "spark plugs," breaking down proteins, carbs, and fats to fuel everything from feather quality to immune function. YOUR PARROT Breeder Boost delivers these critical nutrients in a form birds love—simply add it to their daily water or soft food.

搭配我們的禽鳥專用鈣質補充劑使用，可增強鸚鵡的骨骼和鳥喙的健康。

Pair with YOUR PARROT Calci Power (minerals) for stronger bones and beak health.

在繁殖前 3 週與我們的維他命 E 補充劑一起使用，以最大限度地提高繁殖力以及種蛋孵化率。

Combine with YOUR PARROT Vitamin E (3 weeks before breeding) to boost fertility and egg viability to a maximum.

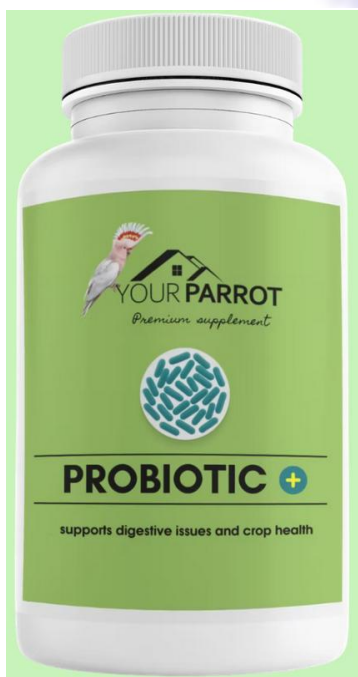

劑量： 每公斤飼料 20 公克 / 14 克量匙 (Dosage: 20 gramm Per kg FEED, Measuring Scoop = 14 GRAMM)

我們的繁殖增強劑是專為配種對鳥在繁殖期前後的針對性營養補充，它提供了必需的維生素、胺基酸和微量元素，以改善健康狀況，提高繁殖力，並促進雛鳥的生長～而為成功的繁殖季節做好準備的理想之選。

Our Breeder Booster is a targeted supplement for breeding pairs before and during the breeding period. It provides essential vitamins, amino acids, and trace elements to improve condition, support fertility, and facilitate chick rearing. Ideal for preparing for a successful breeding season

保存期限：生產後 36 個月 (Shelf Life: 36 months after production)

加強型益生菌 (PROBIOTIC +)

☑ 支持腸道菌叢 (Supports the intestinal flora)

- ✔ 壓力、用藥或飼料轉換後的理想選擇 (Ideal after stress, medication, or feed changes)
- ✔ 有助於營養吸收 (Helps with nutrient absorption)
- ✔ 具含益生菌菌株 (With probiotic cultures)
- ✔ 支援嗦囊功能 (Supports crop function)

我們的強化型益生菌複方是一款益生菌補充劑，旨在維持鳥類消化系統的健康和活力，這款補充劑適用於所有的鳥類，結合了益生菌 (指活的好菌)、益生元 (無法消化但能被好菌利用的膳食纖維或寡糖如同益生菌之糧) 和電解質，能夠有效地平衡腸道菌群，而提升整體活力。

YOUR PARROT Probiotic + is a probiotic powerhouse designed to keep your birds' digestive systems healthy and resilient. Perfect for all bird species, this supplement combines probiotics, prebiotics, and electrolytes to tackle gut imbalances and boost overall vitality.

ps. 結合益生菌、益生元與電解質，三者協同作用，是重塑腸道微生態與提升活力的絕佳策略！

主要優勢／關鍵效益 (Key Benefits)：

消化支持腸胃保健： 平衡嗦囊和腸道菌叢，緩解腹瀉等問題，以及疾病或抗生素治療後之加速恢復。

Digestive Support: Balances crop and intestinal flora, easing issues like diarrhea and speeding recovery after illness or antibiotics.

壓力屏蔽舒緩配方： 於旅行、比賽或繁殖前使用，可於高壓時期保衛腸道健康。

Stress Shield: Use before travel, shows, or breeding to protect gut health during high-pressure moments.

營養強化： 增強食物分解和營養吸收，這對繁殖期的鳥兒尤其重要。

Nutrient Boost: Enhances food breakdown and nutrient absorption, especially critical for breeding birds.

排毒和防禦： 結合毒素並透過促進有益微生物的生長來抑制有害細菌 (如沙門氏菌和大腸桿菌) 之滋長。

Detox & Defense: Binds toxins and crowds out harmful bacteria (like Salmonella and E. coli) by promoting beneficial microbes.

運作原理 (How It Works)：

配方包含已證實有效的益生菌，能夠為腸道調節氧氣，製造出分解食物的消化酶 (酵素) 以幫助消化，並為 "好" 的益菌創造一個繁榮生長的理想環境；加上搭配益生元使用之協同作用，可確保最佳的消化與免疫功能。

The formula includes proven probiotics that oxygenates the gut, produces digestive enzymes, and creates a thriving environment for "good" bacteria. Paired with prebiotics, it ensures optimal digestion and immune function.

使用簡單易上手 (Easy to Use)：

只需與飲用水或軟糧蛋飼料相混拌攪合即可，可與我們的其他營養補充品完美搭配，打造出一個全方位的健康保養計畫。

Just mix with drinking water or soft food. Pair seamlessly with other YOUR PARROT supplements for a full wellness routine.

ps. 可搭配補充劑組合堆疊 (Supplement Stacking) 結合搭配食用，代表不會與其他保健品起衝突，有策略地透過發揮營養素之間的協同作用 (讓彼此的效果加乘)，而讓吸收效果更好，滿足全方位的健康需求。

用量： 每 250 毫升水或 100 克軟食(蛋糧) 10 克 / 14 克量匙

(Dosage: 10 gRAMM PER 250ml WATER OR 100g SOFT FOOD, Measuring scoop = 14 GRAMM)

本品加強型益生菌選項，幫助您的愛鳥維護其自然的腸道菌叢平衡 — 特別是在鳥兒經歷壓力、飼料轉換、抗生素治療或腸胃道問題 (消化不良) 之後尤其重要，活性益生菌與益生元物質可促進健康消化亦幫助您的愛鳥更有效率地吸收營養，從而促進整體的身心安康。

Probiotic + supports your bird's natural intestinal flora — especially important after stress, feed changes, antibiotic treatment, or digestive issues.

The live cultures and prebiotic substances promote healthy digestion and help your bird absorb nutrients more effectively, supporting overall well-being.

保存期限：生產後 36 個月 (Shelf Life: 36 months after production)

維他命 E 補充劑 (VITAMIN E)

- ✔ 提升生育能力 (Supports fertility)
- ✔ 天然抗氧化劑 (Natural antioxidant)
- ✔ 增強肌肉力量 & 提升活力與元氣 (Strengthens muscles & vitality)
- ✔ 於繁殖期或壓力時期格外實用 (Particularly useful during the breeding phase or periods of stress)
- ✔ 對於雄性有激勵效用 (Has a stimulating effect on males)

我們的維生素 E 是一款專為鳥類設計的維生素 E 補充劑，尤其適用於繁殖期，它含有α-生育醇——一種高效且持久的維生素 E 之形式——能夠支持重要的身體功能並提高繁殖成功率。

YOUR PARROT Vitamin E is a specialized vitamin E supplement tailored for birds, particularly during breeding. Featuring αTocopherol— a potent, long-lasting form of vitamin E — it supports critical bodily functions and enhances reproductive outcomes.

ps. α-生育醇是維生素 E 家族中最重要、且唯一能滿足身體日常營養需求的活性形式，它是一種強效的脂溶性抗氧化劑，能保護細胞膜免受自由基的攻擊與破壞。

主要優勢／關鍵效益 (Key Benefits)：

生育力與幼雛健康： 藉由提升受孕率、胚胎存活率以及新生鳥類與爬蟲類的體力 (生命力)，來提高繁殖的成功率。

Fertility & Hatchling Health: Boosts breeding success by improving fertility, embryo survival, and the vigor of newborn birds and reptiles.

細胞保護： 能保護細胞膜免受損傷，並中和有害毒素，以維持組織健康。

Cell Protection: Shields cell membranes from damage and neutralizes harmful toxins to maintain tissue health.

免疫和代謝支持： 促進抗體產生、能量代謝及整體免疫力。

Immune & Metabolic Support: Enhances antibody production, energy metabolism, and overall immunity.

抗壓防禦： 在面對炎熱、寒冷、寄生蟲或感染等情況時 (引發壓力)，維生素 E 的需求量會急劇增加，此時補充維生素 E 變得至關重要。

Stress Defense: Vital during heat, cold, parasites, or infections, when vitamin E demands spike.

為什麼繁殖育種者信賴我們的維生素 E？ (Why Breeders Trust YOUR PARROT Vitamin E)

維生素 E 缺乏會導致肌肉無力、生育能力下降、及後代發育問題。我們的維生素 E 能彌補日常飲食中之攝取不足，進而確保體內的荷爾蒙平衡、肌肉正常運作，以及維持器官的健康。

Vitamin E deficiency can lead to muscle weakness, reduced fertility, and developmental issues in offspring. YOUR PARROT Vitamin E fills

dietary gaps, ensuring optimal hormone balance, muscle function, and organ health.

用量： 每 250 毫升水或 100 克飼料 12 克 / 3 克量匙

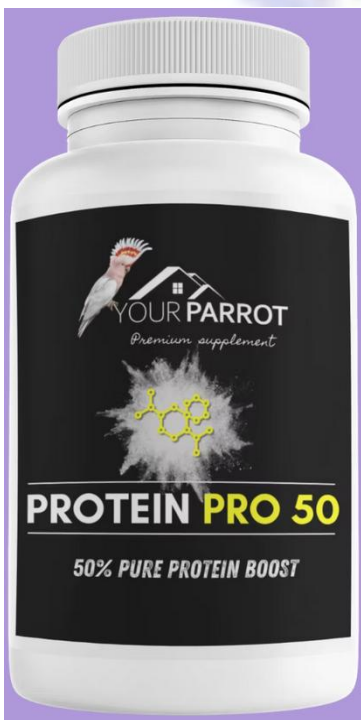

(Dosage: 12 gRAMM PER 250ml WATER or 100g FEED, MEASURING SCOOP = 3 GRAMM)

維生素 E 是一種重要的抗氧化劑以及對於您的愛鳥之生育能力、肌肉健康以及免疫防禦方面都扮演著核心角色，特別是在繁殖育種準備期間或壓力增加的時期，針對性地補充維生素 E 是有利的 — 單獨使用或與硒搭配使用可以達到最好的協同效果。

Vitamin E is an important antioxidant and plays a central role in your bird's fertility, muscle health, and immune defense. Especially during breeding preparation or periods of increased stress, targeted supplementation can be beneficial — used alone or in combination with selenium for maximum effect.

保存期限：生產後 36 個月 (Shelf Life: 36 months after production)

Product article translated and compiled by :

高含量蛋白質補充劑 (PROTEIN PRO 50)

☑ 標靶 (目標性) 蛋白質供給／針對性的蛋白質補充 (For targeted protein supply)

- ✔ 換羽、繁殖、育雛或飼料轉換期的理想選擇 (Ideal during molting, breeding, rearing, or feed changes)
- ✔ 高蛋白質含量 (50%) 且極佳的消化率非常好消化 (High protein content (50%) with very good digestibility)
- ✔ 呵護羽毛發育 (Supports feather development)
- ✔ 用量縱少效果猶佳 (Highly effective even in small amounts)

我們的高含量蛋白質補充劑 PRO 50 是一款優質的營養補充劑，專為滿足繁殖期和換羽期的鳥類高度營養需求而研製，它結合了高生物價蛋白質、均衡的氨基酸以及必需不飽和脂肪酸，能優化 (調整至最佳狀態) 肌肉發展、能量水平與繁殖成功率。

YOUR PARROT Protein Pro 50 is a premium supplement produced to meet the intense nutritional demands of breeding and moulting birds. Combining high-value protein, balanced amino acids, and essential unsaturated fatty acids, it optimizes muscle development, energy, and reproductive success.

主要優勢／關鍵效益 (Key Benefits)：

至關重要的成長支持： 透過溫和配方提供 50%的額外蛋白質，促進親鳥的肌肉發育和雛鳥的健康生長。

Critical Growth Support: Delivers 50% extra protein via a gentle formula, fueling muscle development in parent birds and healthy growth in chicks.

生殖活力／繁衍力 (生殖系統健康狀態與生育能力)： 富含胺基酸與必需脂肪酸，能有效提升受孕率、蛋的品質，並確保孵化出的小鳥健康且具備良好的存活能力。

Reproductive Vitality: Rich in amino acids and essential fatty acids to enhance fertility, egg quality, and chick viability.

持續性能量釋放： 能提供充足的營養與熱量，維持健康的體力，應付繁殖期過程中的龐大消耗，進而減輕親代的過度疲勞與體力透支。

Sustained Energy Release: Supports high energy levels throughout demanding breeding cycles, reducing parent fatigue.

優化消化率 (最佳化吸收)： 經過了特殊處理，更容易被消化，而可確保親代及幼雛在最需要的時刻能夠最大程度地吸收並利用。

Optimized Digestibility: Specially processed for easy absorption, ensuring maximum nutrient uptake when parents and chicks need it most.

為什麼蛋白質在育種中至關重要？ (Why Protein Matters in Breeding)

我們的高含量蛋白質補充劑 PRO 50 提供濃縮、易消化的蛋白質，是成功繁殖的關鍵。它能彌補營養缺口，確保親鳥保持強壯，雛鳥從孵化到離巢茁壯成長，是專業繁殖人士和疼愛鳥兒的寵物鳥飼主們的必備之選。

YOUR PARROT Protein Pro 50 provides the concentrated, highly digestible protein boost essential for successful breeding outcomes. It bridges

the nutritional gap, ensuring parents stay strong and chicks thrive from hatching to fledging. Essential for serious breeders and dedicated pet bird owners.

劑量： 每公斤飼料 50 公克 / 10 克量匙 (Dosage: 50 gRAMM PER 1 kg FEED, MeASURING SCOOP = 10 GRAMM)

本品高含量蛋白質補充劑提供予您的愛鳥高品質、易消化的蛋白質，是繁殖、換羽或育雛期的理想補充品。高達 50% 的蛋白質含量，它能提供針對性的營養補充～於鳥兒的天然需求增加時！故自當為培育出強壯的幼鳥、擁有穩定的羽毛生長以及良好的繁殖成果的絕佳選擇。

Protein Pro 50 provides your bird with high-quality, easily digestible protein — ideal for support during breeding, molting, or rearing. With a protein content of 50%, it offers targeted supplementation when natural requirements are increased. Perfect for strong young birds, stable feather growth, and vital breeding results.
